SKILLS

- Python
- Django
- Django REST Framework
- PostgreSQL
- RESTful API Design
- JavaScript
- HTML / CSS
- Agile Methodologies
- AWS Technologies
- Version control
- CI/CD
- Docker

WORK EXPERIENCE

Technical Sabbatical

(Nov 2024 - Current)

- Took a brief sabbatical for personal growth and skill enhancement.
- Built a Django OIDC package (View [fedauth](#)) - multi-tenant Django admin/frontend login.
- Developed a full-featured Django/DRF sample app with CI/CD, testing, and API design (View [TravelSure](#))
- Did a few courses (DSA, Design Patterns, System Design, ReactJS)
- Updated personal projects and portfolio site.

Byte Orbit

(2018 - 2024)

Intermediate Backend Developer

(Oct 2021- Oct 2024)

- Part of backend team that developed the 'Shoprite MoneyMarket app', a multi-million-user platform awarded MTN's 2022 'Business App of the Year' and 'Most Innovative App'.
- Lead developer for the Money Market USSD app.
- Main stack: Python, Django, Django REST Framework, PostgreSQL.
- Implemented, assisted and optimised high-volume APIs including KYC, Store Locator, and VAS systems – cutting response times by up to 90% via async tasks, caching, and query optimisations.
- Implemented highly reliable ledger transaction APIs processing millions in rands monthly.
- Assisted in delivering robust EFT integration enabling wallet top-ups from any external bank accounts.
- Integrated with in-store legacy POS (Point of Sale) kiosks (using XML)
- Implemented automated daily reporting, integrating with AWS S3 & SFTP file handling, replacing manual workflows and saving Shoprite staff thousands of hours
- Assisted with optimising internal metrics dashboard, cutting load times from several minutes to ~3s
- Streamlined operational workflows by customising Django Admin with group-based access controls and actions – reducing cross-team friction and eliminating time-wasting ad hoc requests.
- Trusted with direct production scripting, handling high-risk, time-sensitive interventions (e.g. account locks during fraud escalations), demonstrating reliability and composure under pressure.
- Worked with supporting technologies such as Redis, Huey, Celery, and Docker.
- Final reviewer on PRs before senior approval.
- Served as mentor to several junior developers.

Intermediate Backend Developer continued (Byte Orbit)

- Supported additional projects via:
 - Code reviews
 - Debugging
 - Dependency upgrades or switching
- Built POC apps using alternate technologies like Node.js, NestJS, TypeScript, WebSockets, Apache Kafka,
- Golang.

Junior Backend Developer

(Jan 2019 - Sep 2021)

- Intern for 5 months, whereafter I started as a junior dev.
- Completed the Udacity Full-stack Developer Nanodegree.
- Contributed to various backend projects, including the award- winning forex and investment app 'Shyft', through bug fixes, code reviews, and new feature development

Outdoor Warehouse

(Feb 2010 - Mar 2018)

- Sale assistant
- Receiving manager

EDUCATION

BSc Human Life Sciences

University of Stellenbosch
2011 - 2013

Diploma in Marketing Management

Boland College
2016 - 2017

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services
